EDUCATION

University of Pennsylvania

Graduation: May 2027

Master of Science in Computer and Information Science

- Relevant Coursework: Software Systems, Machine Learning, Data Science for Finance

University of California, Santa Barbara

Graduation: June 2025

Bachelor of Science in Computer Science | GPA: 3.92/4.00

- Honors: Deans Honors Engineering x9, Distinction in the Major, Undergraduate Mentorship
- Relevant Coursework: Object Oriented Programming, Data Structures and Algorithms, Operating Systems, Computer Communication Networks, Computer Security, Computer Architecture, Deep Learning, CS Capstone

WORK EXPERIENCE

AppFolio

Santa Barbara, California

Develops software-as-a-service applications for the real estate industry

Oct 2024 – Mar 2025

Machine Learning Engineer

- Built an anomalous transaction detection software for early detection of fraudulent activity with an accuracy of 92%
- Collaborated with backend team to integrate into production APIs and conducted A/B testing to validate performance
- Worked to develop an end-to-end pipeline for model development, deployment, and retraining

Syncopation AI

Mountain View, California

Builds automatic patient monitoring tools for fall detection of elderly patients

Jun 2024 – Sep 2024

Software Engineer Intern

- Led 3-member team to develop medical chatbot which diagnoses patients by autonomously querying a patient's vocalized symptoms and private health records, a pioneering technology that emerged due to the incorporation of the AI agent technology
- Developed the chatbot with the emerging Agency Swarm framework, allowing autonomous multi-AI agent communication
- Promoted to Computer Vision team to test company flagship product - patient monitoring algorithms

Dataverse Solutions

Remote

A consulting agency assigning software engineers to companies

Jun 2023 – Sep 2023

DevOps and Data Science Consultant

- Discovered areas of growth for Greenheck by identifying two low return products, using SQL, PowerBI, Snowflake, and ML scripts; Saved hundreds of hours of manual employee labor in reporting data to Latin American clients
- Managed CI/CD pipelines with Jenkins, Ansible, Terraform and AWS Cloud for end-to-end automation of virtual infrastructure
- Designed and deployed Kubernetes clusters and Docker containerized microservices for optimized, scalable infrastructure
- Gained Oracle SQL certification for more efficient SQL querying and updating data, improving task completion speed by 20%

RESEARCH

Early Research Scholars Program (UCSB Security Lab)

Santa Barbara, California

Program sponsoring undergraduate research nationwide

Sep 2022 – Sep 2023

Understanding the Security of Microservice-based SaaS Applications

- Developed a decoy system that mimicked a real website riddled with carefully designed faults to attract malicious attackers
- Eventually exposed potential flaws in the microservice technology – around 30,000 attacks detected
- Categorized the malicious requests to group similar attacks and record the intensity of each attack performed
- Presented our findings during a lightning talk at the 2023 ERSP National Conference in September 2023

SKILLS

- **Technical:** C++, C#, Python, SQL, Java, HTML, CSS, JavaScript, Intermediate: MongoDB, Assembly, Prompt Engineering, SAS, R, PHP, Typescript, Bash, Swift, Ruby, Go, Jenkins, Ruby, PostgreSQL, Next.js
- **Frameworks:** PyTorch, React, Docker, Arduino, Selenium, AngularJS, AWS, Kubernetes, .NET Core, REST APIs, Jenkins
- **Certifications:** Certified Associate in Python Programming, Oracle Certified Java SE 8 Programmer, Blockchain Fundamentals
- **Languages:** English (Advanced), Hindi (Proficient), Spanish (Intermediate)
